

Backlog Grooming

Sprint Backlog Grooming Meeting Minutes

Attendees: Kirneill, Danny, Goncalo, Lenyn

Start time: 6:00 PM

End time: 7:00 PM

The following user stories were created/discussed/refined/prioritized. All user stories were discussed and addressed to the user stories below were groomed on backlog.

#21 End-to-End Feature Testing

As a student, I want all major study workflows tested from beginning to end so I can use the application without encountering broken or incomplete features.

#22 Cross-Device Compatibility Testing

As a student, I want the application tested across supported devices and screen sizes so I can have a consistent experience regardless of the device I use.

#23 Error Handling and Recovery Testing

As a student, I want the application to display clear error messages and recover properly when something goes wrong so I do not lose my study materials or progress.

#24 Performance and Load Testing

As a student, I want the application tested for speed, stability, and responsiveness under different usage conditions so I can study without delays or crashes.

#25 User Acceptance Testing and Release Validation

As a student, I want the final application tested by representative users and validated against the project requirements so I can receive a reliable and polished final product.
